

Introducing Maxworth

We are pleased to introduce Maxworth Resources Pte. Ltd., Singapore, a flagship company of the Maxworth Group. A diversified international conglomerate with operations and associate entities across Singapore, Hong Kong, Indonesia, India, Dubai, and Zambia, positioning us strategically within key international markets. Together, with a shared strategic vision and integrated management, our group companies are engaged in multiple sectors including:

- **Coal Beneficiation & Handling: Over 25+ million metric tonnes annually.**
- **Global Commodities Trade: Agriculture, coal, chemicals, and metal sectors.**
- **Mining: 44,000 hectares Manganese mines located in Zambia**
- **Testing & Monitoring: NABL-accredited Labs & Drone surveying.**
- **Power: 150+ MW Thermal & Biomass Power plants; 120+ MW Solar (100MW/year pipeline)**
- **Gas: 200,000kgs of CNG every month.**
- **Real Estate: \$100 million capital deployed.**
- **Social Impact: Lancet Healthcare lab services, IoTrix water management, and shopping mall constructions.**

Maxworth is currently acquiring strategic stakes across various holdings within its affiliated group of companies, as part of a broader consolidation and growth strategy to strengthen the group's overall capabilities and market presence.

As our next phase of growth, we are aggressively foraying into the Battery Energy Storage Systems (BESS) sector, with the aim of building a flagship vertical under this dynamic umbrella of Maxworth. We recognize BESS as a game-changing solution for grid balancing, momentum shift to renewable integration, and industrial energy management.

To this end, we are actively seeking strategic partnerships and Joint Ventures (JV) with leading technology providers, system integrators, and global innovators in the energy storage space. With our deep access to Indian markets and strong relationships with governments, DISCOMs, SEBs, PSUs, and industrial clients, we offer our partners:

- **State & National-level Government liaisoning and ministerial connections with Regulatory expertise**
- **Market Entry acceleration & Project management through vast execution network**
- **Reliable infrastructure, land, and capital readiness across key growth states**

We are keen on working with partners offering containerized BESS technologies, integrated systems, advanced EMS, and operational know-how.
